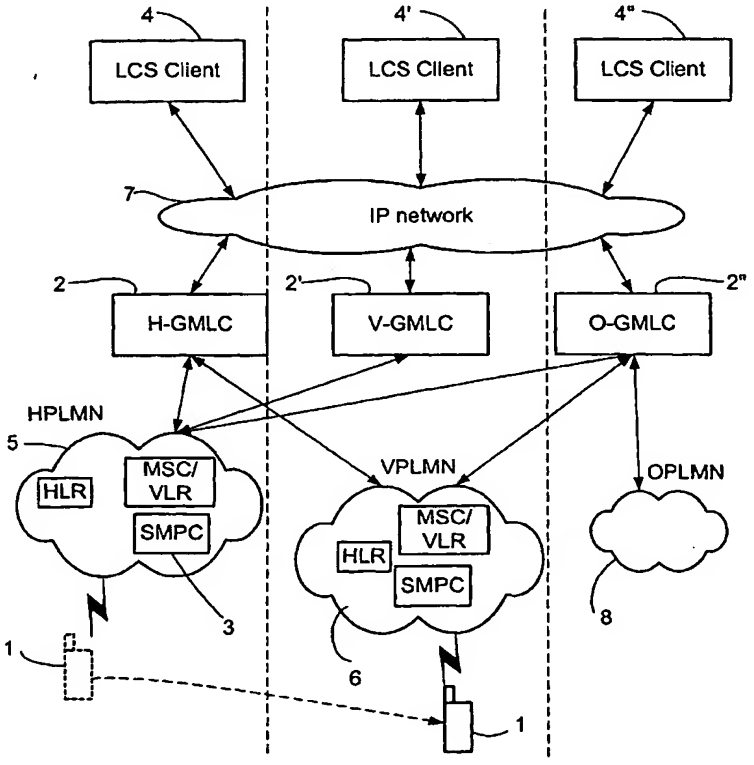
(54) Title: A METHOD AND SYSTEM FOR POSITIONING IN A MOBILE COMMUNICATIONS NETWORK



(57) Abstract: A method and system for obtaining the position of a mobile station (1) located in a current network of a communications system including a plurality of networks supporting different positioning protocols. The current network (6) (107) is identified at a location centre (2) based on the identified current network (6), a suitable positioning protocol is selected among at least two protocols for communication of location information with the current network (6) (108).
